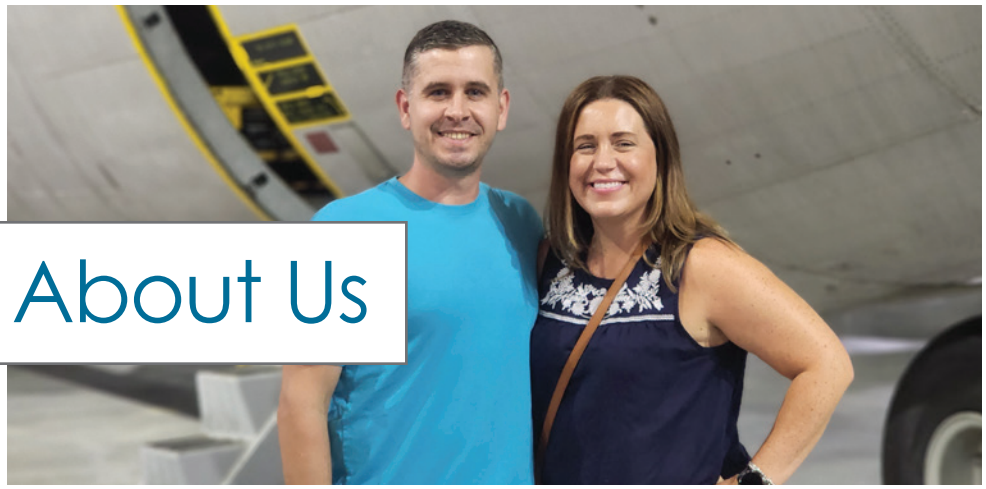
Eric & Rebecca

About Us



We met in the summer of 2009 through mutual friends of ours. At the time Rebecca was working for a local college and Eric at a local hospital while attending college. After several years of dating we married in 2016. The home we live in now we have been in for 10 years. We both are with stable employment. Rebecca now works in Human Resource for a local medical business and Eric as a Respiratory Therapist at a local hospital. When we are not working we enjoy getting together with friends for dinner and watching movies. We also spend a lot of time outside hiking and bicycling.

About Rebecca

written by Eric

When I met Rebecca this first thing I noticed was her beautiful smile. Since that moment I have come to find what a loving and compassionate person she is. She is a strong woman with grit and determination which helps her and I work through obstacles. She is an affectionate dog mother who provides our dogs with all the cuddles they could ever need. Rebecca volunteers her time to help others whether it is dogs at the rescue or people at a local lodge for disabled adults. She always seems to find a way to make friends. Most importantly she is a kind and uplifting wife.

About Eric

written by Rebecca

Eric is the most patient, kindest man I have ever met. He is great with children when we are around families or our friends' children. He is very active. When he is not working you can find his outside hiking, fishing, hunting, cycling, walking the dogs, playing disc golf and anything else he can find to do. The way that Eric cares for our dogs, I know he will be an incredible dad. He always puts others feelings first and is very considerate.

We both love dogs. We will always have a dog in our home. After rescuing our first dog we decided we would always rescue in the future. All of our dogs have come from the same rescue.

We enjoy riding bikes and hiking together on the weekends or in the evenings. We try to eat healthy and stay active year around. But we enjoy a pizza once a week on the weekends.

Eric likes to spend time in the woods in the spring searching for mushrooms and deer antlers. Deer shed their antlers every year, and if you look long and hard enough you can find them in the woods.

Our Home

When people come to our home the first time they typically describe it as cozy and comfortable. Our home is Cape Cod style home with 2 bedrooms and 1 bath. We have a fenced in backyard with a beautiful garden we enjoy working in. Our house is located in a quiet suburb with several museums and parks nearby to visit. We like to entertain friends and go to concerts at a small nearby venue.

Our Dogs:

We have two dogs that we rescued from a local shelter. Freddie is a 10 year old Bichon Frise and Rusty a 6 year old West Highland Terrier. They love to cuddle and take walks every day. Rusty especially likes to play fetch while Freddie is okay with just watching while cuddling.

Our Family & Friends

Eric is the youngest of the family with two older brothers. Eric's brothers reside in Indiana and Minnesota. He is the uncle of two nieces and two nephews from ages 8 to 19 years. Our family gets together frequently to celebrate holidays and birthdays. Eric's parents live in a nearby town which makes visiting with them a weekly routine.

Rebecca has one sister. She has three nieces and one nephew who are very involved in sports. Rebecca's family enjoys attending their sporting events .Rebecca's parents are divorced, but remain good friends and celebrate holidays and birthdays as a whole family. Rebecca's dad is remarried and his wife also attends family gatherings.

We have broad group of friends that consist of people we have meet in high school and college who we remain close with. We like to get together on the weekends for canoe trips and cook outs. In the fall we like to get the solo stove out and enjoy a fire with one another.

Dear Birthmother,

Thank you sincerely for taking the time to get to know our family. We feel blessed to be a part of your journey and we will pray for you as you work your way through the process. If you decide to choose us your child will be surrounded by loving family committed to their development. We will encourage them to try any sports activities that they are interested in. They will experience nature and learn of its beauty by participating in our current hobbies. They will be encouraged and loved through all that they encounter. Together we are committed to raising a child as if it was our very own. We plan to also make sure that our child grows up knowing the background of their culture and we would plan to incorporate it in our daily lives. We want to make sure that this is something that is not lost through adoption.

Eric & Rebecca

Why Adoption?

We have had some hurdles becoming parents. However, while we are going through each hurdle, we know that we won't be happy until we are parents. We have been on a long journey trying to conceive. We have done IVF twice without success. We always knew that adoption would quite possibly be in our future. Instead of taking the time and resources to try again we decided that adoption was the best way for us to start a family. Our desire to have a family has helped us push through the obstacles to make it happen. Adoption for us is an opportunity to be the parents we have always wanted to be. We have taken the time to heal and come to terms with our failed IVF. Now we are excited and hopeful for this new opportunity.
